

WOW! Introduces Whole-Home WiFi Mesh Internet to Eliminate Dead Zones and Slow Zones Across Entire Footprint

WOW!'s innovative new WiFi solution for fast, reliable WiFi is now available for WOW! customers nationwide.

Englewood, Colo. – July 31, 2018 – [WOW! Internet, Cable & Phone](#) (NYSE: WOW), a leading broadband and communications service provider, today announced the availability of its new WOW! Whole-Home WiFi solution across the entirety of WOW!'s service-area footprint. Whole-Home WiFi is WOW!'s new mesh network solution that provides WOW! customers a custom, scalable network to stream, work and browse from every corner of their home. WOW! initially rolled out the solution to Columbus, Ohio and Pinellas, Florida on July 10th.

WOW!'s Whole-Home WiFi solution, which uses the [eero](#) home WiFi system, ensures fast, secure, and reliable service across the entire home. Instead of using a single router, Whole-Home WiFi is customized to every home using multiple eero access points, learning your space, devices and network usage to deliver fast Internet anywhere you need. In addition, WOW!'s new mesh network solution provides increased security over traditional routers.

“Today, we have unleashed the fastest, most reliable and most secure WiFi solution to the entirety of WOW!'s footprint after the amazing response from customers in both Columbus, Ohio and Pinellas, Florida,” said Teresa Elder, CEO of WOW!. “For WOW! customers everywhere, there are now no slow zones – just WOW! zones, meaning hassle-free downloading, streaming and gaming from every corner of the home.”

WOW!'s Whole-Home WiFi solution is highlighted by its unmatched customer support and comes with a convenient, white-glove set-up from a WOW! technician, ensuring the entire home has seamless connectivity. WOW! technicians will customize the WiFi network to a home's specific needs, giving customers the best and most secure connection possible no matter where they're streaming, downloading, surfing or gaming.

With 50 billion connected devices [expected by 2020](#), and some households expected to have up to [50 devices](#) connected via a single WiFi network, reliable and secure WiFi is critical for customer satisfaction.

“Home WiFi systems should protect customers from the increasing number of security threats to connected devices in the home,” said Nate Hardison, co-founder and head of product, eero inc. “We built eero hardware and software together to ensure that we can control and improve digital security, and know WOW! customers will benefit from this new offering.”

WOW! Whole-Home WiFi is easily bundled with WOW! residential Internet services. With Whole Home WiFi, customers can choose from a handful of fast Internet speed options alongside TV and phone packages that are best suited to each customer’s needs. WOW! offers three residential Internet speeds: Internet 100 – up to 100Mbps, Internet 500 – up to 500Mbps and Internet 1000, WOW!’s offering with speeds up to 1Gbps – the fastest residential speed in WOW!’s bundles.
